

Cutting-edge Video Wall Technology Now Within Reach for Law Enforcement Agencies of Any Size

Hiperwall® visual command center at the Santa Ana Police Department in Southern California

Purchasing and maintaining a video command center used to be so expensive that it was out of reach for many law enforcement agencies. And the technology was complex, requiring specialized training. Hiperwall® eliminates all of these drawbacks.

With Hiperwall, small to mid-sized law enforcement agencies can build visual command centers at an affordable price—to save more lives. And federal agencies with existing visual command centers can build larger display systems in more locations at a fraction of the cost compared to existing solutions.

How do we do it? Simple. It's the nature of our technology that makes the difference. Hiperwall technology is software based and hardware agnostic. While other solutions today must be purchased in combination—both hardware and software—this is not the case for us. Hiperwall can be used with almost any hardware, and technology updates can be made within minutes. Gone are the days of being forced to purchase proprietary hardware—or allowing it to become obsolete over time. You choose which brands of computers, displays and network equipment you want to use.

“The Hiperwall system enables the sector command center to maintain situational awareness for real-time news feeds, display or vessel activity and overseeing Coast Guard missions along 350 miles of coastline.”

– **USCG Lt. Cmdr. Juan Miguel**

“Hiperwall video wall saves lives, money.”

– **Commercial Integrator**

“The management console is great. Other local police and fire departments have been impressed by it and are looking to install similar systems.”

– **Troy Campbell,**
IT specialist and
cyberthreat intelligence
architect, Kansas City
Police Department

Hiperwall brings you the following benefits:

- Full situational awareness provides effective decision support
- Live data and video feeds from almost any source delivers important information at a glance
- Specialized triggers set off automatic alerts for faster and better awareness of a situation
- Ease of use brings instant value though a brief learning curve; install and operate the same day
- All so that you can see the big picture to save lives—and your budget

Hiperwall Advantages	
Affordability	No proprietary hardware means no high-cost components.
Usability	If you can create a PowerPoint slide, you can run Hiperwall. No special training is needed.
Scalability	Add monitors and increase the size of your video wall incrementally, overtime, with each budget cycle.
Extensibility	Deliver content to multiple locations within a facility, such as a control room, conference room, private office, lobby, etc., all from one centrally managed system.
Flexibility	Use your own hardware—any brand you want.
Changeability	Move and resize high-resolution content instantly, and mix content from live and pre-recorded sources.

The Singapore Ministry of Defense selected Hiperwall as the core of the country's Changi Regional Humanitarian Assistance and Disaster Relief Coordination Centre (RHCC), which coordinates relief efforts between countries when natural disasters strike.

The greatest validation of Hiperwall's value is how it can serve you—in your community, in your agency, to protect your citizens. Interested in seeing how Hiperwall can help you? We'd be happy to answer any questions or set up a live demonstration in our showroom or over the web. Just give us a call, send us an email, or visit our website. We look forward to sharing more about Hiperwall and learning more about your specific needs.
