

NetProtector

Digital BackOffice NetProtector enables granular control over network access and continuous monitoring of network endpoints to help prevent the spread of malware and other threats that can leave your network and organization vulnerable and expose your business to potential harm.

The DBO NetProtector Difference

DBO NetProtector, powered by Trustwave's patented NAC solutions, is designed to protect networks of all sizes, providing critical advantages to organizations, including:

- Full life-cycle protection for all endpoints, managed and unmanaged
- Agentless network access control combined with zero-day threat prevention and automated policy enforcement
- Network intelligence that provides a unified view of endpoint activity, delivering powerful analysis of your network's history and usage

Together, these features deliver comprehensive endpoint control, offering security checks throughout the lifecycle of a device's network access.

Powered by Trustwave technologies, Digital Back Office Netprotector Network Access Control Services provides K-12 and other public sector organizations with a robust, cost effective and cloud-based solution for compliance and security challenges created by BYOD.

Embrace BYOD With DBO NetProtector

Integrated Support of BYOD

DBO NetProtector mitigates challenges related to BYOD and supports your BYOD and mobile access strategy and initiatives through:

Device Identification

Clear identification of iOS and Android personal mobile devices as well as others that connect to the wired or wireless network.

Authentication and Device Categorization

Easy authorization and placement of devices into BYOD specific security zones for management purposes.

Threat Prevention

Via automated detection and restriction or quarantine of non-compliant devices based on device type, vulnerability assessment, potentially malicious behavior, or infection.

DBO NetProtector detects and continuously evaluates all entrants to the target network based on acceptance criteria for pre-admission and continuous monitoring post-admission.

Solution Portfolio

Trustwave Enterprise NAC

A highly scalable, full-cycle NAC solution that is uniquely designed for large organizations with thousands of endpoints.

- Management for thousands of endpoints
- Centralized, Web-based UI with unified configuration and reporting support
- Deployed virtually inline, compatible with any network infrastructure

For smaller networks, Trustwave offers a lightweight, full-function, standalone NAC option.

Digital BackOffice NetProtector

DBO NetProtector offered as a fully managed service.

- Includes same features and functions as Trustwave Enterprise NAC
- Maintains NAC sensor integrity and health
- Provides reduced cost with no capital expense
- 99.99% service level guarantee
- Integration with the Nutmeg/CEN Networks in Connecticut
- Network help desk for your cloud
