

SECURITY LIFECYCLE REVIEW

Complete application visibility and actionable security intelligence

Assess your organization's current cybersecurity posture — and minimize exposure to business and security risks. The Security Lifecycle Review risk assessment will show you which SaaS and other applications, URL traffic, content types, and known and unknown threats are currently traversing your network, specifically highlighting where potential risks exist.

Request your customized Security Lifecycle Review to see:

- Applications in use, and the potential risks to exposure
- Specific details on ways adversaries are attempting to breach your network
- Comparison data for your organization, versus your industry peers
- Key areas to focus on for reducing your organization's risk exposure

For Public Sector Call Dale Bruckhart at 203-874-5545 Ext. 118 or email daleb@digitalbackoffice.com

For Commercial Call Doug Haddad at 203-874-5545 Ext. 125 or email dough@digitalbackoffice.com
